Stability and storage

Ascorbic Acid Ultra Fine Powder is fairly stable to air if protected from humidity, but is somewhat sensitive to heat. The product may be stored for 24 months from the date of manufacture in the unopened original container and at a temperature below 25 °C. The 'best use before' date is printed on the label. On prolonged storage, a slight yellow discoloration may occur which, however, does not affect the biological activity. In aqueous solutions, ascorbic acid is decomposed by oxygen and by other oxidizing agents, particularly in the presence of alkali and of ions of metals such as copper and iron.
